

Roger™ wireless solutions for work

Reasonable Accommodation funding

Even the most sophisticated hearing aids have limitations. This is no more apparent than the challenging listening environment of the modern workplace. The Roger portfolio consists of wireless microphones and receivers. They pick up the speaker's voice and transmit it to receivers connected to your hearing aid or directly in some cases, so you can hear speech clearly over distance and noise.

Roger microphones

*Roger iN microphones have capacity to install Roger receivers directly into several Phonak hearing aids with no need for external receivers.

Roger Table Mic II/iN
Designed for meetings; several microphones can be connected to cover large meetings.

Roger Select™/iN
A versatile microphone which automatically selects the person who is talking and with Bluetooth® for phone calls.

Roger Pen™/iN
A handy microphone with portable design and Bluetooth for phone calls.

**both traditional and iN Roger mics are available*

Universal Roger receivers

Roger X
Universal miniature receiver.

Roger MyLink
Neck loop receiver for hearing aids or implants with a telecoil.

Situations

Situations with background noise or where the sound source is at a distance are ones where Roger truly excels:

Small meetings

Small meetings can be overwhelming for people wearing hearing aids. Place one microphone on the meeting table and hear your colleagues clearly.

Large meetings

In large meetings multiple Roger Table Mic II will do an excellent job picking up all voices.

Meetings with presenters

When the presenter wears a Roger microphone that works with the table microphone you can hear the speech clearly from all participants.

One-on-one conversation in noise

When surrounded by distracting noise hang a Roger microphone around your colleague's neck or clip it on to the collar.

Multimedia

Video conferencing systems and Internet calls are frequently used at work. Simply connect your Roger microphone, using the audio cable.

Phone calls

By connecting Roger Pen or Roger Select to your phone via Bluetooth you can hear phone calls directly through your hearing aids or implants.

Foundations for reimbursement

Americans with Disabilities Act (ADA)

The Americans with Disabilities Act of 1990 or ADA is a civil rights law that prohibits discrimination based on disability. Workplace accommodations, including assistive listening devices, like Roger, are granted upon employee request.

How can I get funding for Roger?

- 1) Determine which Roger Solution is best:
With your audiologist or through the EasyGuide.phonakpro.com, describe your work environment so you can get the accommodation that helps you thrive at work.
- 2) Ask your audiologist to use a trial of that Roger device:
If you can try the Roger out in the real-world, this will help you understand how it will help you.
- 3) Download a templated request letter at:
www.morethanahearingaid.com/ada
In a letter to your human resources or line manager, request the accommodation you've been prescribed.

- 4) Set up the fitting appointment with your audiologist.
- 5) After the employer agrees to your accommodation, you may need another appointment with your audiologist.
If not, be sure that your employer gets a copy of the invoice to pay.

***You can even provide your employer information about possible tax incentives. These resources are available at www.morethanahearingaid.com/ada*
